Advancing Composites

Tomorrow's Composites, Today!

The IDI 3i Composites Technology Center is the research and development division of IDI Composites International. It will generate and prove new ideas, approaches and materials to address the engineering and performance challenges of both our customers and the industry.

The IDI 3i Composites Technology Center

Services & Capabilities

- Material Development and Testing
- Part Prototyping and Testing
- Tooling and Manufacturing Sourcing Support
- Part Design and Material Conversion Analysis
- Consulting

The 3i Composites Technology Conference Center

Mission

The IDI 3i Composites Technology Center's mission is to design, develop and manufacture thermoset composite compounds for innovative customers seeking to go beyond the value limitations of conventional materials.
